

For a COMFORT ONE patient, Alaska health care workers will not start CPR and will stop CPR if it was initiated.

Recommendations to Health Care Workers:

Appropriately trained and equipped health care workers

may provide comfort care to the do not resuscitate patient by:

Suctioning the airway

Administering oxygen

Assisting the patient to a comfortable position

Providing emotional support

Contacting hospice, home health agency, or attending physician

Providing pain medication (advanced life support personnel with standing orders)

Health care workers **should not:**

Use advanced airway devices, such as an ET tube or multilumen airway

Initiate cardiac monitoring

Administer cardiac resuscitation drugs

Defibrillate

Provide ventilatory assistance
