

## BLSO™ Provider Course

Adapted from the Advanced Life Support in Obstetrics (ALSO) program, BLSO is an educational program designed to enhance cognitive and procedural skills for medical, nursing and physician assistant students, pre-hospital care providers and emergency department personnel.

### Overall Course Objectives

1. Improve the management of normal deliveries, as well as obstetrical emergencies by standardizing the skills of emergency personnel, first responders and medical, nursing and physician assistant students.
2. Facilitate productive, collegial interactions between all students interested in maternity care, first responders and maternity care providers.
3. Assist in establishing and maintaining high standards of education and training for first responders in pre-hospital care, emergency personnel and students in healthcare.
4. Elevate the quality of patient care, teamwork and patient safety in pre-hospital, emergency personnel and students interested in the provision of maternity care.

Detailed educational objectives are listed at the beginning of each BLSO chapter.

Please note: As of 9/28/2022, there is no CME Credit associated with the BLSO Provider course.

### BLSO™ Course Disclaimer

The material presented at this course is being made available by the American Academy of Family Physicians for educational purposes only.

This material is not intended to represent the only, nor necessarily the best, methods or procedures appropriate for the medical situations discussed, but rather is intended to present an approach, view, statement, or opinion of the instructor which may be helpful to others who face similar situations.

The AAFP disclaims any and all liability for injury, or other damages, resulting to any individual attending this course and for all claims which may arise out of the use of the techniques demonstrated therein by such individuals, whether these claims shall be asserted by a learner, or any other person.

Every effort has been made to assure the accuracy of the data presented at this course. Learners may care to check specific details, such as drug doses and contraindications, etc., in standard sources prior to clinical application.
